Introducing **MG-COLLECTION**

The Ultimate Solution for Professional Microneedling

DermapenWorld is proud to announce a new synergy within its Dp Dermaceuticals Solutions—the MG-Collection™. Suitable for use with Dermapen, Dermapen INFUSE, Dermapen INJECT and other mesotherapy treatments, the MG-Collection represents the gold standard in professional microneedling infusion protocols. This range of potent Meso-Glides™ offers your clinic the next level of active ingredients and skincare technology available.

The Story Behind Our MG-Collection

Our commitment to developing the ultimate mesotherapy solutions inspired our MG-Collection. As the name suggests, our Meso-Glide serums help the Dermapen 4 device move effortlessly across the skin, creating 1920 microchannels per second to absorb the active ingredients for the very best results.

Exclusively developed for professionals, MG-Collection offers a combination of beneficial sterile active ingredients and breakthrough skin technologies to be needed into the skin.

Bespoke Skincare

Whether your goal is to rejuvenate or brighten, reduce scarring or problematic skin, our premixed sterile Meso-Glide solutions are premium formulations in one easy-to-use glass vial.

Use the Meso-Glides on their own or combine 1:1 with MG-HA35 or MG-HA35+ depending on the individual skincare concern. MG-HA35 and MG-HA35+ contain an unprecedented concentration of Hyaluronic Acid (HA) at 35 mg/ml.

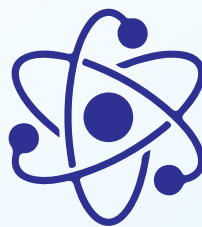

Mixing the sterile Meso-Glides with our potent HylaFuse™ Hyaluronic Acid technology infuses the skin with hydration for a visibly plumper, radiant skin and reduces the appearance of fine lines and wrinkles.

Prize

The Ultimate Innovation

The MG-Collection allows you to deliver the right combination of skincare ingredients with cutting-edge technologies to deliver biocompatible actives into the skin for exceptional results.

HylaFuse Complex

HylaFuse Complex is our signature 3 molecular weight Hyaluronic Acid (HA) formulation. It's clinically proven to be absorbed 150% more effectively than other forms of Hyaluronic Acid. HylaFuse encapsulates other active ingredients and biologically active HA, delivering them deep into the skin for up to 8 hours after application. *Featured in entire MG-Collection

Calphasomes™ Bioactives

The advanced technology acts as a controlled delivery system for both oil- and water-based actives. One of the key ingredients, Hydroxyapatite — a naturally occurring mineral which is harvested from phosphate rock, works as a barrier to the hazardous and negative effects of ultraviolet radiations from the sun. It also contains calcium, which accelerates rapid skin cell regeneration to help repair damaged skin. Calphasomes protect and enhance the barrier function and integrity of stratum corneum, the outermost layer of the skin.

*Featured in MG-HA35 and MG-HA35+

Nobel Prize Inspired Telomeres Innovation

Geranylgeranylisopropanol (GGP) has been shown to stabilise the telomeres in skin cells, which assists in prolonging the life of a cell. Due to this protective role, skin barrier function, firmness and elasticity are enhanced, and the anti-ageing effect reduces fine lines and wrinkles.

The discovery of how chromosomes are protected by Telomeres was awarded the Nobel Prize in Physiology or Medicine in 2009. *Featured in MG-HA35+

NEW

MG-BL

To brighten and lighten uneven skin tone

MG-CLR

Designed to help clear skin and address problematic skin concerns

MG-R.A.S

To help "Reverse Ageing and Scars"

MG-HA35+

To intensely hydrate skin and help improve the visible effects of ageing

MG-HA35

To intensely hydrate skin and help improve the visible effects of ageing

MG-HA35+ To intensely hydrate skin and help improve the visible effects of ageing

Contains HylaFuse at an unprecedented strength of Hyaluronic Acid at 35 mg/ml, as well as the Calphasomes delivery system for greater absorption.

Featuring the revolutionary telomeres technology, the inclusion of GGP helps prolong the life of a cell to reduce the visible effects of ageing. This hard-working Meso-Glide is fortified with antioxidants, peptides, Vitamins A, B, C, E and Zinc.

Performance ingredients: anti-inflammatories Darutoside (active ingredient of Sigesbeckia Orientalis) and Centella Asiatica Extract help with wound healing and visibly reduce irritation and redness.

MG-HA35 To restore, refresh and enhance

Contains HylaFuse at an unprecedented strength of Hyaluronic Acid at 35 mg/ml, as well as the Calphasomes delivery system for greater absorption.

The addition of Zinc speeds up collagen synthesis for better skin repair and works as a skin astringent to decrease natural oil production.

Vitamin B5 contributes to the natural ability to moisturise, soothe, heal and regenerate skin. It works in MG-HA35 to increase skin's hydration, softness and elasticity. Performance ingredients: Zinc, Vitamin B5

MG-R.A.S. To help reverse the signs of ageing and scars

This **Reverse Ageing & Scars (R.A.S.)** formula contains a powerful blend of antioxidants, vitamins, peptides and botanical extracts renowned for their anti-ageing and enhancing effects. The HylaFuse technology ensures effective delivery of active ingredients.

Contains Retinaldehyde, which is considered the most active form of retinoid (Vitamin A) that does not require a prescription. It improves and regulates cellular activity to visibly reduce discolouration and fine lines, wrinkles and rough skin.

Performance ingredients: Vitamin A (Retinaldehyde), Vitamin E, Centella Asiatica Extract, Copper Peptides

MG-BL

To brighten and lighten uneven skin tone

For clients with stubborn hyperpigmented or melasma affected skin concerns, MG-BL can help reduce the appearance of unwanted pigmentation. HylaFuse technology delivers hydration along with natural skin brighteners Uva Ursi Leaf Extract and Vitamin C.

Licorice Root and Kojic Acid are both tyrosinase inhibitors that can help slow the production of melanin. MG-BL helps brighten and lighten the complexion and can reduce the appearance of age spots, sunspots, melasma and dark pigmentation associated with certain scars.

Performance ingredients: Licorice Root, Uva Ursi Leaf Extract, Vitamin C and Kojic Acid

Applying pigment-sedative BRITE LITE and protective COVER RECOVER sunscreen is recommended to help clients with stubborn hyperpigmentation achieve the best results.

MG-CLR Designed to help clear skin and address problematic skin concerns

Antimicrobial peptides and bio-compatible extracts combine to help clear problematic breakouts and enhance the visible complexion of skin troubled by acne, blackheads/comedones, open pores and oily skin.

The potent anti-inflammatories, Oligopeptide-10 and Boswellia Serrata Extract, have been shown to help to calm and soothe skin and reduce some common symptoms of problematic skin. Vitamin B3 also contains anti-inflammatory properties and stimulates collagen to reduce the look of wrinkles and fine lines.

#Use as stand alone MG's or optional mix 1:1 ratio MG-HA35 or MG-HA-35+
MG-Collection are not designed to cure disease, these products together with microneedling
may improve the appearance of various skin conditions.

The Ultimate Convenience

The 5 formulations are packed in 5 ml Luer-lock syringe-compatible glass vials. It couldn't be easier to deliver the right combination of high-performance ingredients for different skincare conditions, minimizing any waste.

Each vial is packaged to the highest Good Manufacturing Practice (GMP) standards, ensuring absolute sterility. The pressure-vacuum sealed packaging features a convenient silicone dispenser nozzle with a Luer-lock tip enabling it to be used directly from the bottle dispensed into an Anti-Contamination Management (ACM) sterile kit.

Alternatively, it can be drawn up with a sterile Luer-lock syringe for procedural use.

- Perfectly blended
- Sterile
- Single use
- Convenient luer-lock nozzle

Directions for Use

As a stand-alone topical or 1:1 ratio

Each Meso-Glide can be used on its own to be infused topically into the skin while performing a Dermapen microneedling treatment. Or combine MG-BL, MG-CLR or MG-R.A.S. with MG-HA35 or MG-HA35+ at a 1:1 ratio.

1. Cleanse and disinfect the skin
2. Apply the Meso-Glide (MG) to one area at a time
3. Proceed with microneedling treatment as per instructions
